PROFESSIONAL SUMMARY

Full Stack Developer Intern with hands-on experience building responsive web applications using React.js, JavaScript, ASP.NET Core, C#, Node.js, Express.js, SQL Server, and MySQL. Experienced in developing REST APIs, reusable React components, CRUD operations, JWT authentication, role-based access control, search, filtering, pagination, reporting, and frontend-backend integration. Built full-stack applications for employee attendance management, recruitment management, timesheet management, and college event management. Seeking Full Stack Developer opportunities.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), C#, Python, Java, C, SQL
Frontend: React.js, HTML5, CSS3, React Router, React Hooks, Axios, Responsive Design
Backend: ASP.NET Core, Node.js, Express.js, REST APIs
Databases: SQL Server, MySQL
Development: CRUD Operations, JWT Authentication, Authorization, Role-Based Access Control, API Integration, JSON, Search, Filtering, Pagination, Reporting
Tools: Git, GitHub, VS Code, Swagger, Jira, npm

INTERNSHIP EXPERIENCE

Technoforte Software Pvt. Ltd.
Full Stack Developer Intern | Bengaluru, India | June 2026 – Present
Technologies: React.js | ASP.NET Core | C# | SQL Server | JWT

Project 1: Smart Hire – Recruitment Management System

React.js | ASP.NET Core | C# | SQL Server | JWT
Live Demo | GitHub

- Developed a full-stack recruitment management system covering job postings, candidate management, assessments, and interview workflows using React.js and ASP.NET Core.
- Built responsive React.js interfaces using reusable components and integrated frontend workflows with ASP.NET Core REST APIs for seamless data communication.
- Implemented job and candidate management workflows with CRUD operations, search, filtering, and pagination to support efficient recruitment data management.
- Implemented JWT-based authentication and role-based authorization to control secure access across recruitment modules and user roles.

Project 2: Employee Meeting Attendance Management System

React.js | ASP.NET Core | C# | SQL Server | JWT
Live Demo | GitHub

- Developed a role-based employee meeting and attendance management system with dedicated Admin, Manager, and Employee workflows for managing meetings, teams, and attendance activities.
- Implemented department, manager, employee, meeting scheduling, and attendance workflows using React.js with ASP.NET Core REST APIs and SQL Server integration.
- Developed meeting-wise and monthly attendance reports with search, filtering, pagination, attendee tracking, and attendance percentage calculations.
- Implemented automated daily stand-up meeting generation for managers, with logic to exclude weekends and Indian public holidays using a public holiday API.

PROJECTS

College Event Management System
React.js | Node.js | Express.js | MySQL

- Developed a full-stack college event management platform for organizing events, approvals, registrations, and participant management using React.js, Node.js, Express.js, and MySQL.
- Built reusable React.js components and integrated them with Node.js/Express.js REST APIs using Axios for event and user management.
- Implemented role-based access control with distinct permissions for Admin, Dean, Department, Teacher, and Student roles.
- Implemented event filtering, reporting, and calendar-based event management with a responsive React.js interface for efficient event administration.
- Developed RESTful APIs using Node.js and Express.js and integrated MySQL for structured management of users, events, registrations, and participant data.

Apple Quality Detection using Deep Learning
Python | CNN | VGG19 | MobileNet | EfficientNet

- Developed a deep learning-based image classification system to automatically classify apple images as fresh or rotten using Python and convolutional neural networks.
- Performed image preprocessing and dataset preparation to support training, validation, and evaluation of CNN and transfer-learning models.
- Implemented and evaluated transfer-learning models including VGG19, MobileNet, and EfficientNet, comparing their performance using test accuracy.

Boutique Management System
HTML | CSS | JavaScript | PHP | MySQL

- Developed a web-based boutique management application for handling customer bookings and billing operations using HTML, CSS, JavaScript, PHP, and MySQL.
- Implemented user authentication, an admin dashboard, and CRUD functionality for managing boutique records and operations.
- Integrated MySQL for storing and managing application data with structured database operations.
- Designed a responsive and user-friendly interface using HTML, CSS, and JavaScript for an accessible browsing experience.

EDUCATION

Master of Computer Applications (MCA)
Jyoti Nivas College (Autonomous), Bengaluru
2024 – 2026 | Expected October 2026

Bachelor of Computer Applications (BCA)
Krupanidhi Degree College, Bengaluru
2021 – 2024 | 89%

CERTIFICATIONS

- Data Science Certification — Imarticus Learning
- Full Stack Development — Udemy
- Python Programming — Udemy
- Cloud Computing — NPTEL
